HIS 1300: U.S. in Global Perspective

Introduction to the history of the United States within a global context from 1776 to the present. Examines the ways a distinctly American society developed within larger patterns of world history. Themes explored may include: nationalism; imperialism; revolution; concepts of democracy, freedom, and equality; migration and immigration; industrialization and economic systems; and global conflict.

Subtitles
Fascism in the Americas

From ancient trade routes linking the world together, to war at sea, to modern cruise liners and container ships, the seas and oceans of the world have been the stage on which history has played out. This course looks at how humans around the world at all times have used the oceans for travel, for commerce, and for war.

David_A_Smith@baylor.edu
HIS 3315 – History of West Africa (to the 1960s)

The course considers attendant and multifaceted developments in West Africa in transnational and global perspectives, transcending landmarked historical periods up to the 1960s. How do we holistically comprehend developments of the medieval West African empires, the Trans-Atlantic Slave Trade, colonization, decolonization, and much more? This is an African history as much as a world history course. Learning about one allows you to better appreciate the other.

Dr George Njung
George_Njung@baylor.edu
MWF: 10:10-11:00 AM
Latin America has been built through complex historical processes. Since independence in the beginning of the 1800s, conflicting ideas of progress charted paths to both democracy and dictatorship as societies experimented with open markets, socialism, and revolution. This course surveys both recent trends in Latin America and their historical antecedents.

HIS 3384: The History of Indigenous Peoples of America
(Tr @ 12:30 with Dr Sweet)
In 1965 Cesar Chavez and the National Farmworker Association union joined Filipino–American farmworkers in a strike for better working conditions and better wages in central California. That marked the starting point for what became the most successful agricultural rights movement in U.S. history.

This course will explore the farm worker struggle as well as movements for educational and political rights that came to be known as The Chicano Movement in the 1960s and 1970s. Come and learn how Mexican Americans championed civil rights and compelled America to make good on its promise for democracy for all.

Dr. Felipe Hinojosa
Tue/Thur 11:00 – 12:15 pm
HIS 4366, Spring 2024
American Legal History to 1877

Dr. Kristina Benham
MWF: 12:20-1:10

Survey legal and constitutional ideas, key cases and debates, in American history from the colonial era to 1877. We will focus on legally based questions of equality, race, religion, and related issues. This course will focus on readings, in-class discussion, and assignments related to primary documents from the time period.
HISTORY OF THE AMERICAN WOMAN
1600—1865

Colonial Witches (?!), Disguised Soldiers in the Revolutionary War, Teachers of the First Public Schools, Leaders of the Underground Railroad…

What was it like to be a woman in the past? And how else have different women shaped our nation?

FIND OUT in HIS 4377

TR 2-3:15, Spring 2024, Dr. Turpin
For more information, email andrea_turpin@baylor.edu
This class provides an overview of the origins, course, and legacy of the US experience in the Vietnam War. Though obviously an event of great significance for the country, its place in modern American (and world) history remains important, but somewhat misunderstood. However, on the fiftieth anniversary of the signing of the Paris Peace Accords, it is a good point to ask some crucial questions about the war and the tumultuous years in which it occurred.
